## **INTRODUCTION**

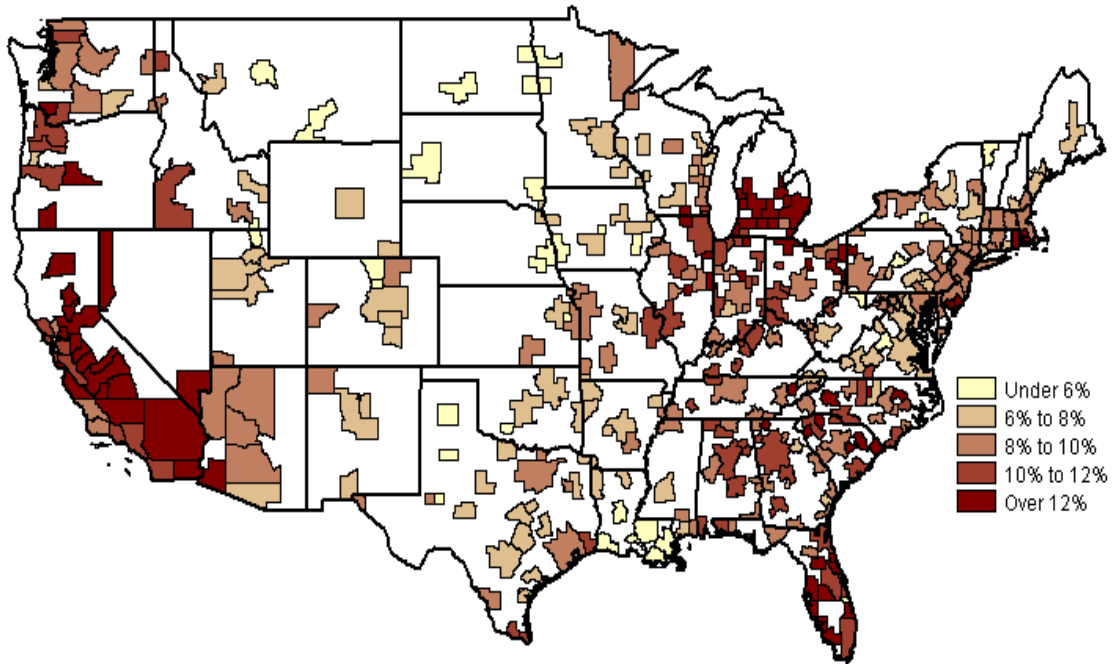

As we usher in 2010 with optimism, it is difficult not to note the hardship the U.S. economy endured in 2009 as the worst of the Great Recession ran its course. There were 4.16 million net job losses last year, sending the unemployment rate from 7.7% in January to 10% in December. Credit conditions were tight and many local housing markets were stymied in disarray. Consumers ratcheted back spending in the face of economic uncertainty, and exports—which served as the nation's crutch through most of 2008—slowed down dramatically, as economic turmoil spread across the globe. The result was a recession that was truly widespread and a tremendous burden in many metropolitan areas across the nation. Metros comprise 86% of U.S. employment and 90% of output, so it comes to no surprise that the nation's economic centers were very badly damaged by persistent job cuts and surging unemployment through 2009.

Fortunately, there were positive signs toward the latter part of the year. Job losses are leveling off, the unemployment rate is nearing its peak, exports are on the rise, and consumer spending and income are trending upward. This is great news for metro area economies, the nation's economic engines, which will drive growth during the recovery years. However, even though many metros will begin to rebound in 2010, they are far away from a recovery—especially in their labor markets.

## **METROPOLITAN AREA UNEMPLOYMENT**

The U.S. unemployment rate will peak in the first quarter of 2010, averaging 10.2% between January-March. This is up from a whopping 4.9% just two years earlier. The tremendous rise in unemployment over 2008 and 2009 has been felt in all metro areas, although in some much more than others. In November 2009, the latest month of available metro data, the jobless rate was up in all 363 metropolitan areas year-over-year, but by over 50% in 116 of those metros. Unemployment topped 10% in 135 metros, 12% in 74 metros, and 15% in 20 metros. Looking at Figure 1, it's evident that metro areas in the West, Southeast, and Upper Midwest are the ones grappling with the highest unemployment rates in the country. Among the 25 metro areas with the highest jobless rates there are eleven in California, seven in Michigan, and two in both Illinois and Florida. Unemployment has skyrocketed in these areas because they have been hit particularly hard by the correction in the real estate market and/or are heavily dependent on the manufacturing sector. Conversely, the Plains and Mountain Regions were more insulated from the housing bubble and the worst of the recession, which has suppressed the upward movement of unemployment.

**Figure 1: Metropolitan Area Unemployment Rates Across the Country**

Focusing on the 100 largest metros (Figure 2), California again dominates the list of highest unemployment rates, in particular the Central Valley—Modesto, Stockton, Fresno, Bakersfield, and Sacramento occupy five of the top ten spots – undoubtedly driven by the fallout associated with the housing bubble, and the state’s massive budget problems, which is a major detriment to the region’s large government sector. Other West coast housing bubble areas include Las Vegas and Reno, NV, which, coupled with the pullback in tourism spending, has pushed the jobless rate in those metros over 12%. On the East Coast, Tampa and neighboring Sarasota, FL experienced sizeable growth in the mid 2000s when their real estate markets were hot but have since been devastated by the market corrections. Not surprisingly, metro areas dependent on auto manufacturing in Michigan (Detroit, Grand Rapids, Lansing) and Ohio (Youngstown, Toledo) round out the large metros with the highest unemployment. For comparison, note the right side of the table, metro areas that have experienced only a minor rise in joblessness. Many are in the central U.S. and the Mountain Region, which were somewhat insulated from the housing crisis. Their labor markets were also not as highly leveraged in the sectors that were battered by this recession, namely construction and manufacturing.

**FIGURE 2: NOVEMBER 2009 UNEMPLOYMENT RATES, 100 LARGEST METRO AREAS**

<b>Highest (%)</b>		<b>Lowest (%)</b>	
Modesto, CA	18.0	San Antonio, TX	6.9
Stockton, CA	17.2	Virginia Beach, VA-NC	6.8
Fresno, CA	16.7	Des Moines, IA	6.7
Detroit-Warren-Livonia, MI	16.4	Oklahoma City, OK	6.7
Bakersfield, CA	15.6	Little Rock-North Little Rock, AR	6.6
Riverside-San Bernardino-Ontario, CA	14.4	Ogden-Clearfield, UT	6.5
Youngstown-Warren-Boardman, OH-PA	14.2	Salt Lake City, UT	6.4
Grand Rapids-Wyoming, MI	12.7	Washington, DC-VA-MD-WV	6.3
Sarasota-Bradenton-Venice, FL	12.7	Madison, WI	6.1
Sacramento, CA	12.7	Fayetteville, AR-MO	6.1
Lansing-East Lansing, MI	12.6	New Orleans-Metairie-Kenner, LA	6.0
Las Vegas-Paradise, NV	12.5	Baton Rouge, LA	5.9
Toledo, OH	12.4	Honolulu, HI	5.8
Reno-Sparks, NV	12.4	Boulder, CO	5.6
Tampa-St. Petersburg-Clearwater, FL	12.3	Omaha-Council Bluffs, NE-IA	4.9

What is just as alarming as the double-digit unemployment in many of the nation's major metro areas is the lethargic rate at which it will recede once the job market turns around. Despite expected employment growth in many metro area labor markets during the first half of 2010, there will be little change to the unemployment rate in the near-term. The initial growth in payrolls will not be fast enough to make a significant dent in the unemployment rate because of new job seekers entering the labor force once jobs start to become available. Therefore the unemployment rate will improve modestly, but still remain painfully high in many metro areas over the next four years (Figure 3).

**FIGURE 3: THE UNEMPLOYMENT RATE ACROSS METRO AREAS**  
(NUMBER OF METROS, END OF YEAR)

<b>Rate</b>	<b>2007</b>	<b>2009</b>	<b>2011</b>	<b>2013</b>
Over 15%	1	23	6	2
Over 12%	2	90	47	8
Over 10%	4	149	105	37
Over 8%	13	272	214	117
Over 6%	50	342	325	269

Looking ahead, the unemployment rate will ease in the hardest hit of the 100 largest metro areas by the end of 2013, but many that were among the highest in unemployment in November of 2009 will still be heavily jobless(Figure 4). California's Central Valley will still be home to some of the highest unemployed metro labor

forces in the nation as the region shakes off the lingering effects of the housing crisis. The metros in Nevada will still have rates at or close to 10%. The manufacturing-heavy metro areas in the Upper Midwest will continue to grapple with high unemployment through 2013. At the other end of the spectrum, in addition to the central U.S. and Mountain Regions, metros in the Middle Atlantic and Virginia will see unemployment fall back to the 5% range.

**FIGURE 4: UNEMPLOYMENT RATES FOR THE LARGEST METRO AREAS, END OF 2013**

<b>Highest (%)</b>		<b>Lowest (%)</b>	
Modesto, CA	12.8	Durham, NC	5.7
Stockton, CA	12.4	Salt Lake City, UT	5.6
Bakersfield, CA	11.9	Baltimore-Towson, MD	5.5
Fresno, CA	11.9	Harrisburg-Carlisle, PA	5.5
Detroit-Warren-Livonia, MI	11.8	Omaha-Council Bluffs, NE-IA	5.4
Toledo, OH	10.9	Dover, DE	5.4
Youngstown-Warren-Boardman, OH-PA	10.1	Madison, WI	5.4
Reno-Sparks, NV	10.0	Trenton-Ewing, NJ	5.4
Carson City, NV	9.9	Richmond, VA	5.4
Las Vegas-Paradise, NV	9.9	Fayetteville, AR-MO	5.3
Dayton, OH	9.9	Virginia Beach, VA-NC	5.2
McAllen-Edinburg-Pharr, TX	9.8	Des Moines, IA	5.1
Fort Wayne, IN	9.6	Honolulu, HI	5.0
Chicago-Naperville-Joliet, IL-IN-WI	9.6	Boulder, CO	4.7
Riverside-San Bernardino-Ontario, CA	9.4	Washington, DC-VA-MD-WV	4.3

Our economic forecast for the nation's 363 metros shows that unemployment rates will decrease in all of them over the next four years, but they will remain at elevated levels. As can be seen in Appendix Table 10, jobless rates skyrocketed between the fourth quarter of 2007 and the end of 2009, surging by 5% or more in 182 metros and by more than 8% in some of the hardest hit areas, which includes large metros such as Detroit, MI, Las Vegas, NV, Youngstown, OH, Riverside, CA, and Fresno, CA. Even as recovery in the labor markets pick up steam in 2011-13, unemployment will not return to pre-recession levels during that period for any metro area.

The appropriate federal response to these persistent dire conditions across so many metros should be clear. The effort to ameliorate the human and economic costs of unemployment needs to be sustained, and targeted directly to those metro areas where so much of the labor force is underutilized, unable to contribute to our nation's economic growth.

## RETURN-TO-PEAK EMPLOYMENT

A second key feature of the outlook for metropolitan labor markets is the projected timeline for each metro's return to pre-recession peak employment. This is the point at which labor markets can be defined as fully recovered. Overall, metro area employment will recover at a similar pace as the national average, and both are projected to return to peak levels during the second half of 2012. (Note that though job levels will have returned to pre-recession levels, the unemployment rate will remain elevated for a longer time as additional jobs must be created to match the ongoing growth in the labor force.)

For individual metro areas, however, the outlook varies considerably. As indicated in Figure 5 below, some will take five years or more to fully recover to pre-recession employment levels. Appendix Table 11 provides detailed data regarding the forecasted return-to-peak performance for all 363 metros.

**FIGURE 5: METRO RETURN-TO-PEAK EMPLOYMENT BY YEAR**

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2012</b>	<b>2013</b>	<b>2014</b>	<b>2015+</b>
No. of Metros:	8	10	44	118	76	25	82

For most of the strongest and weakest performers, the severity of job losses during recession is the primary factor determining the time frame of their rebounds. For example, two Texas metro areas that are expected to recover quickly - San Antonio and Austin - will record respective peak-to-trough declines of only 1.2% and 0.8% this recession, while the all-metro average plummets 4.9%. Both will return to peak employment this year. On the other hand, many of the Indiana and Michigan metros will see payrolls contract more than 10% before bottoming out, and are facing recovery periods of stretching beyond this decade. The challenge for the upper Midwestern region is made all the more difficult by limited economic diversification and dismal population growth that will prevent it from mounting a serious rebound anytime in the near future. In contrast, there are many housing bust metro areas in states such as Arizona, California, and Florida, that have suffered similarly devastating job losses but are far better equipped for recovery and long-term growth. Strong services economies and healthy population growth make near-term recovery in these areas attainable. Metros such as Riverside, CA and Phoenix, AZ will suffer double-digit job losses before the end of the recession, but are expected to return to peak employment as soon as 2014.

## GROSS METROPOLITAN PRODUCT

U.S. metro economies once again proved to be the driving force of the nation's economic performance in 2009, accounting for 90.1% of the nation's gross domestic product for the year, 90.3% of wage and salary income, and 86.2% of all jobs.

The list of top performers was largely unchanged from prior years—the New York metropolitan area ranked first, with a 2009 gross metropolitan product (GMP) of \$1.26 trillion, followed by Los Angeles (\$709 billion), Chicago (\$514 billion), Houston (\$408 billion), and the District of Columbia (\$396 billion). A full list of GMP rankings is included in Appendix Table 1 of the report.

However, more noteworthy are the real GMP growth rates in light of the U.S. recession. Total real gross metropolitan product declined 2.2% in 2009—better than the 2.5% contraction for U.S. real gross domestic product, but an abrupt turn for the worse nevertheless. The true magnitude of the downturn becomes apparent when counting the number of metros that saw real output decline in 2009. Overall, 316 metro areas recorded real GMP contractions on the year, including 153 in excess of 2%, and 38 of more than 4%. The collection of metros that managed to eke out real GMP gains in 2009 still felt the effects of recession, as 43 of these 47 metros still saw weaker growth than in 2008.

**FIGURE 6: 2009 REAL GROSS METRO PRODUCT GROWTH, 100 LARGEST METRO AREAS**

Highest (%)		Lowest (%)	
Baton Rouge, LA	0.8	Atlanta-Sandy Springs-Marietta, GA	-3.6
Oklahoma City, OK	0.7	Las Vegas-Paradise, NV	-3.6
Huntsville, AL	0.7	San Jose-Sunnyvale-Santa Clara, CA	-3.7
El Paso, TX	0.6	Tampa-St. Petersburg-Clearwater, FL	-3.7
Austin-Round Rock, TX	0.5	Charlotte-Gastonia-Concord, NC-SC	-3.8
San Antonio, TX	0.3	Santa Rosa-Petaluma, CA	-4.1
Jackson, MS	0.1	Oxnard-Thousand Oaks-Ventura, CA	-4.3
Colorado Springs, CO	-0.1	Cleveland-Elyria-Mentor, OH	-4.3
Dallas-Fort Worth-Arlington, TX	-0.1	Phoenix-Mesa-Scottsdale, AZ	-4.4
Columbia, SC	-0.1	Toledo, OH	-4.8
Tulsa, OK	-0.2	Reno-Sparks, NV	-5.5
Madison, WI	-0.2	Boise City-Nampa, ID	-5.6
Houston-Sugar Land-Baytown, TX	-0.2	Sarasota-Bradenton-Venice, FL	-5.7
Syracuse, NY	-0.4	Cape Coral-Fort Myers, FL	-5.9
Rochester, NY	-0.5	Detroit-Warren-Livonia, MI	-5.9

It comes as little surprise that the weakest performers out of the 100 largest metro areas are concentrated in the upper Midwestern states and the housing states of Florida, California, and Nevada. After the unraveling of the Rust Belt manufacturing industries early on in the recession and the severe collapse of real estate bubbles, these regions have also been battling severe job losses and record high unemployment rates. The top of the list of stronger performers is populated by a number of metros in the West South Central states of Texas and Oklahoma,

including Austin, Dallas, Houston, Oklahoma City, and Tulsa. These areas remained insulated from the early phase of the recession, due in part to robust energy markets and high commodity prices, and have since experienced relatively mild downturns.

## **UPDATE ON SURFACE TRANSPORTATION INFRASTRUCTURE INVESTMENT**

Our nation's metro areas contain a significant share of the U.S. population and make an even larger contribution to the U.S. economy. As we've demonstrated in this report, they have also been significantly damaged by the Great Recession. Despite their import and their deterioration, however, our metro areas, as described in this report, are not receiving their appropriate share of federal stimulus spending in the form of surface transportation funds allocated by the States. These are funds that could be put to immediate use to bolster metro economies by providing jobs on shovel-ready projects.

Our previous study of state-allocated surface transportation spending across the nation's largest metropolitan areas found that only 48.3% of approved funding was allocated by States to metro areas, despite their population share of 63% and Gross Domestic Product share of 73%. As of January 8<sup>th</sup> 2010, \$22.3 billion dollars has been approved for surface transportation projects nationwide. Of that amount, \$10.3 billion is apportioned to the metropolitan areas in our study. This represents 46% of the state-approved funding for surface transportation projects supported by funds provided by the Federal Highway Administration--once again a disproportionately low level of funding by either crucial measure, GSP or population share.

The American Recovery and Reinvestment Act has contributed mightily to the nation's economy. Global Insight estimates that the full stimulus adds about 0.8 percentage point to 2009 GDP growth and 1.3 percentage points to 2010 growth, and creates or saves just under 2.5-million jobs by the fourth quarter of 2010. Since our previous study, there has been some recognition of the disparity between the contribution of metro areas to the national economy, and the transportation stimulus funding they have received. In the 2009 report, we documented a shortfall for the most underfunded metros in the hundreds of millions of dollars. In the intervening period, we find that four of those five areas have closed their respective funding gaps. Figure 7 below provides a snapshot of funding in the June report, versus the January report for those five cities.

**FIGURE 7: SURFACE TRANSPORTATION FUNDING UNDER ARRA**

**Greatest Degree of Underfunding in June 2009 report**

<b>Metro Area</b>	<b>GMP share</b>	<b>Stimulus share</b>	<b>Shortfall (millions)</b>
Seattle, WA	68.6%	4.6%	\$317.8
Boston, MA	77.2%	19.9%	\$192.5
Phoenix, AZ	75.6%	30.9%	\$233.8
Omaha, NE	49.7%	4.9%	\$26.9
Chicago, IL	78.4%	42.4%	\$249.7

**Funding as of January 8, 2010**

<b>Metro Area</b>	<b>GMP share</b>	<b>Stimulus share</b>	<b>Shortfall (millions)</b>
Seattle, WA	68.6%	47.9%	\$83.6
Boston, MA	77.2%	47.2%	\$82.7
Phoenix, AZ	75.6%	29.7%	\$144.4
Omaha, NE	49.7%	23.7%	\$37.4
Chicago, IL	78.4%	51%	\$238.1

However, enormous disparities remain, not just for these metros, but for many others as well. Las Vegas contributes 75.1% of Nevada's Gross State Product, and is currently receiving only 30.9% of the state's approved funding. New York, NY, is also receiving a disproportionately low share of approved funds, as it is responsible for 75.9% of the state's GSP, and is currently receiving only 23.8% of approved surface transportation funding (see Appendix Table 12 for the full set of results).

The allocation of funding also bares little relation to the severity of a metro's unemployment problem. Forty-five of the largest 85 metropolitan areas examined here have double digit unemployment. Notably, 35 of these high unemployment metros received a funding share that is less than their contribution to their respective state economies. Among these are Los Angeles, Atlanta, and Detroit.

## CONCLUSION

This report has documented the plight of the nation's metro areas as the nation starts a new decade. High unemployment rates will stubbornly persist across our metro economies. Unemployment tops 10% in 149 of our nation's metro areas. In two years these double digit rates of unemployment will continue to persist in 105 metros.

These metro areas have been the engines of US economic growth over the previous decades. In 2009 they contributed 90.1% of the nations' Gross Domestic Product. We project that in 2010 they will contribute 93% of US economic growth. Yet we have found that in one important component of our nation's future, our investment in critical surface transportation infrastructure, the largest metro economies are under-funded relative to reasonable measures of their contribution. Closer attention must be paid to the relationship between the economic health of our nation's metro areas and the health of the nation as a whole. Right now both are on the mend, and we believe the national economy can recover more quickly by more directly delegating federal funds to cities and their metro economies.
